## Completely Self Sufficient & Easy To Use

- **Combines with a Mothership:** To shorten growing cycles
- **Vegetation Upgrade available:** Includes cloning shelf, 125W CFL and MH bulbs
- **18 Plant Flowering Chamber:** Powered by a dual air-cooled, 400W lighting system with 3' of growing height
- **2 x Lumatek Digital Ballasts:** For low power consumption out of MH or HPS bulbs.
- **Lumen Output:** Produces more lumens than plants can absorb per square foot
- **Five Fans:** Work symbiotically to extract and filter air.
- **Constant CO2:** Maintained at 1600PPM
- **Odor Control:** Unmatched odor control using our cocoa carbon filter
- **54" W x 51" H x 28" D** (wheels on)

- GroSmart™ Technology - Programmed to control lighting, watering, CO2 & exhaust. The most user-friendly models on the market.
- Medical grade finish naturally resists mold and mildew while reflecting full light spectrum.
- Unlimited toll-free technical & growing support provided 16 hours per day, 7 days a week.
- Easy-to-follow manuals and custom feeding schedules for all levels
- Draws less power than most household appliances
- Built-in odor control
- 3 Year Warranty

## Hydroponics Watering System

BCNL's unique hydroponics watering system features two quiet water pumps. The pumps are timed to come on and off, providing the perfect feeding levels as each plant is fed by individual drip emitters.

- Custom designed lids for optimal plant spacing
- Air bubblers in the tub ensure the roots receive oxygen
- Pump out old nutrients with the flip of a switch

## Nutrient Packages

BC Northern Lights has teamed up with Advanced Nutrients to create the ultimate feeding schedule. Producer owners receive custom recipes and nutrient packages designed for the Producer growing environment. Please visit our website for a list of nutrient packages.

\*Included nutrient pack may not be exactly as shown

### Available Producer Options:

Standard, No Hydro, No CO2, Producer Royale, Producer Royale with Cheese, Producer with T-5 Upgrade

**CO2 Tank:** BCNL can't ship compressed air by law. The Producer comes with the CO2 regulator, hook-ups and a pre-programmed timer to automatically inject the perfect amount of CO2. A 20 LB tank can be purchased or rented from beverage supply stores, welding supply stores, brewhouses, your local hydroponic supply store or party supplier. See your manual or give us a call when you're ready to hook it up.

**PH Pen:** PH Pens are used in co-ordination with the feeding schedule provided. Different plants like different PH levels and this digital PH Pen allows for a quick, easy PH measurement whenever you are mixing your nutrients. Please ask your BCNL rep for a quote, as we can ship this with your unit.
